INTRODUCING THE AVC690 & AVO690...

The AVC690 (normally closed) and AVO690 (normally open) are compact actuated valves suitable for gas and liquid applications, and designed to have a very high cycle life.

They can be used to aid high pressure cycle testing for Research and Development lab work. They are also used in pneumatic and hydraulic control panels, and can be used in a range of sectors including oil & gas, hydrogen, amongst others.
