

XHS-300 Series

Diaphragm Sensed Pressure Regulator with Single 100W Heater

An economical heated regulator available in 'side entry' or 'in-line' heat transfer options to maintain sample gases in their vapour state. The 'in-line' design maximizes the heat transfer area via a unique spiral machined heater sheath, which mixes the gas and ensures efficient heat transfer. The 'side entry' design can be used in applications where heat transfer is less critical, and where installations have height restrictions. Both options incorporate an efficient 100W heater cartridge, and are fully serviceable to remove carbon deposits and maintain maximum heat transfer.

Applications:

Natural Gas sample systems
Oxygen sample systems
Moisture sample system

Features:

- IECEx, ATEX certified to EEx d IIC T3
- 100W Heater cartridge
- Strong Inconel X750 Convoluted diaphragm
- Easy to wire potted board with 115V or 230V supply
- Fully serviceable design
- Optional entry points for cable supply
